DETAILED ACTION

1. The amendment after final has been received and made of record. As requested, claims 2-4 have been cancelled. Claims 5-16 are pending in the instant application.

2. The indicated allowability of claim 11 is withdrawn in view of the newly discovered reference(s) to Mann (US Patent 5,514,081). Rejections based on the newly cited reference(s) follow.

Claim Objections

3. Claim 9 is objected to because of the following informalities: claim 9 recites “a shoulder-to-crotch strap... for extending to underneath the groin region **or** said user...” It appears the claim should recite “for extending to underneath the groin region **of** said user...” Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Mann (US Patent 5,514,081). Mann discloses an orthotic device for manipulating a user's limb comprising a structural body portion (76), an inflatable member (34), a retention member (straps 92 and 94) interconnecting said structural body portion and said inflatable member such that a portion of the

Art Unit: 3743

limb can be inserted between the body portion and inflatable member, and an inflating device (58) for inflating the inflatable member such that the member tends to push against the limb such that said limb is urged towards the structural body portion to result in extension of the limb.

Allowable Subject Matter

6. Claims 5-10, and 12-16 are allowed.
7. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
